

Welcome to the OpenClaw Masterclass!

We're really glad you're here. Before you start the first lesson, grab your five gifts below. They're reference materials we've put together **to help you throughout the course** - have them ready and you'll get the most out of every lesson.

Gift 1 - OpenClaw: The Complete Guide. A visual ebook that explains what OpenClaw is, how it works, and what you'll build in this course. Read this first if you want a quick overview before diving into the lessons.

Gift 2 - The OpenClaw Academy. A free online guide covering everything you need to know about OpenClaw, from the basics to advanced setups. Use it to look up concepts, find commands, explore use cases, or go deeper on any topic at your own pace. The Academy is available in 6 languages - English, Polish, Spanish, French, German, and Portuguese.

Gift 3 - 50 Things Your OpenClaw Agent Can Do. A two-page list of real things your agent can handle for you. Read through it and notice which ones make you think "wait, it can do that?" - those are the ones to try first.

Gift 4 - OpenClaw Vocabulary Guide. Every term you'll hear in the course, explained in one or two sentences. Keep this open during the first few lessons so you're never lost.

Gift 5 - OpenClaw Quick Reference Card. The most important commands in one place - gateway commands, Telegram shortcuts, file locations, environment variables, useful links, and quick fixes. Come back to this whenever you need something fast, or print it and keep it next to your screen.

Four of these gifts are PDFs you can download from the resources section below. **The OpenClaw Academy** is online - you'll find the link there too. We'll see you in the first lesson!

All the best,

Damian & Krystian
