

If you want to connect your **ChatGPT subscription to OpenClaw on your VPS** instead of using the Anthropic API key, **skip ahead to Lecture 27 (Adding API Keys & Smart Routing)** where I show you exactly how to do it through OAuth. Once that's done, come back here and continue with the next lesson.

You just need one working AI model connected before we continue. It doesn't matter which one.

Thank you. All the best,
Damian
